

COLOMBIA

ELEVATION
 0 ft (0 m) 18,799 ft (5,730 m)
 PRIMARY GROWING REGION FARMER SUPPORT CENTER
 ARABICA COFFEE AREAS

Colombia boasts some of the highest elevations for growing coffee. Higher in the mountains, warm days and cold nights slow the green bean's growth, creating dense, high-quality coffees. Our Farmer Support Center partners in Colombia work with farmers to increase the quality of their coffee and productivity (increase the amount of coffee cherries at harvest).

ARABICA ALTITUDE
2,600 - 6,200 ft
(792 m - 1,890 m)

PRIMARY VARIETALS
Typica, Bourbon, Tabi,
Caturra, Colombia,
Margogype, Castillo

PRIMARY PROCESSING
METHODS
Washed
