Washed

HARVEST
October - February

Coffee is deeply rooted in Puerto Rico's history and culture. To invest in the future of the country's coffee supply following Hurricane Maria, Starbucks partnered with World Coffee Research, a nonprofit committed to enhancing quality coffee production. Our partnership improves coffee seed quality and creates a more sustainable future for Puerto Rican coffee farmers. Seeds were provided to local farming communities in Puerto Rico so they would have access to disease resistant varieties of coffee trees to plant.
