PRIMARY GROWING REGION

ARABICA COFFEE AREAS

Jamaica is an island country located to the South of Cuba in the Caribbean Sea. High in Jamaica's Blue Mountains grow some of the world's rarest and exquisite coffee. Shrouded by a blue tinted mist, these beans are nurtured by blankets of dew and fertile soil, the ideal growing conditions for high quality coffee.

The Jamaican Agricultural Commodities Regulatory Authority (JACRA) sets meticulous standards for growing, harvesting, and processing their coffee, with each bean being inspected and certified to meet rigorous quality standards before it can earn the Jamaica Blue Mountain name. Jamaica Blue Mountain coffee produces mouthwatering layers of cocoa and citrus in the cup, unlike any other coffee in the world.

ARABICA ALTITUDE

3,280 ft – 5,905 ft
(1,000 m – 1,800 m)

PRIMARY VARIETALS

Bourbon, Typica,
Caturra, Gesha
