## Did You Know?

Sunsera Blend™ is our lightest roasted coffee yet and it pairs perfectly with a blueberry muffin or chocolate chip cookie.

## Learning Suggestion

Try Sunsera Blend™ hot and iced, side by side, and notice the difference in flavors.

## Story Behind the Coffee

Sunsera Blend™ began when our coffee team identified an opportunity to create our lightest roasted coffee yet that is smooth, sweet and enjoyable hot or over ice. The art of developing a coffee blend goes beyond simply mixing beans together. It requires a deep understanding of the coffee’s terroir, processing methods, roast and the interplay of these variables to create intentional, distinct flavors. Our skilled development team and master roasters worked together through many iterations to create this delicious, bright coffee.

Sunsera Blend™ is a mix of beans from Colombia and Brazil and is comprised of all three processing methods – washed, honey (semi-washed), and natural (sun-dried). Each component plays a crucial role in creating the balanced flavors of zesty citrus and toasted almonds.
